---	----------

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.32.2. The release software package is comprised of the following:

- VS GUI application 1.7.32.2
- VistA M patch SD*5.3*826

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see [Features and Functionality](#) for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.32.2 and VistA patch SD*5.3*826.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.32.2 package and VistA patch SD*5.3*826.

Work Item ID	Summary of Change
VSE-4007	VistA: Modify SDES GET MISSION ACT ELIG to include the "VETERAN" appointment request type as possible input
VSE-4283	VistA: Modify RPC, SDES GET MISSION ACT ELIG, add required input parameter "CLINIC", and modify routine to no longer pull CLINIC from requests.
VSE-4281	VistA: Service/Specialty Not Displaying for APPT/VETERAN Requests
VSE-4181	VistA: Modify SDEC GET APPT REQ BY IEN JSON to return patient comments),
VSE-3798	VS GUI: Calendar in Group View or Provider Schedules view cuts off availability
VSE-3874	User should not be able to create clinic group name larger than 30 chars
VSE-3767	VistA: Update SDES CREATE APPT REQ to accept a 409.1 APPOINTMENT TYPE Name
VSE-3769	VS GUI: Limit Number of Characters Allowed in Patient Search to 30 characters.
VSE-3787	VistA: Modify RPCs to return an empty data element rather than an error
VSE-3837	VS GUI: View veteran appointment request
VSE-3838	VS GUI: Context menu display for VETERAN appointment requests

Work Item ID	Summary of Change
<u>VSE-3848</u>	VistA: Create SDES RPC to add clinic to clinic group
<u>VSE-3849</u>	VistA: Create a SDES RPC to read a single clinic group
<u>VSE-3850</u>	VistA: Create a SDES RPC to remove a clinic from a clinic group
<u>VSE-3852</u>	VistA: Create a SDES RPC to Check-Out an appointment
<u>VSE-3856</u>	VistA: Create a SDES RPC to remove a clinic group
<u>VSE-3861</u>	VistA: Create post install routine to cleanup check-ins in VPS
<u>VSE-3871</u>	VistA: Modify SDES GET CLIN AVAILABILITY to return an empty data element
<u>VSE-3962</u>	VistA: Modify SDES GET CLIN AVAILABILITY to accept dates in the past
<u>VSE-4065</u>	VistA: Update application code in remote application entry
<u>VSE-4066</u>	VistA: Update SDES CREATE APPT REQ to add AMIS Primary and Secondary stop codes

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.32.2 and VistA patch SD*5.3*826. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

4. User Documentation

The documentation distributed with VS GUI Release 1.7.32.2 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
